Symposia

A - From Theory to Experiment: Advances in Materials Engineering

B - VII Brazilian Electroceramics Symposium

C - Organic Electronics and Spintronics

D - Advanced Powder Technology

E - Surface Engineering: Protective Coatings and Modified Surfaces

F - Novel Semiconductor Architectures

G - Nanostructured Polymers and Polymer-based Nanocomposites

H - Advanced Materials for Separation Technologies

I - Carbon Based Nanomaterials

J - Titanium Alloys: Fundamentals, Applications and Future Trends

K - Nanotechnology and Nanomaterials Applied to Biotechnology and Agriculture

L - Advanced Materials for Microelectronics

M - Recent Advances on Nanostructured Materials for Alternative Energy: Production and Storage - II

N - New Materials Containing Stable and Metastable Austenite Phase

O - Structure-properties Relationship of Advanced Metallic Materials

P - Joining Technology-adhesion Research and Development
