Excellence in the union of science and research
in materials technology in Brazil

Symposia

- A:** Functional hybrid interfaces: from characterization to applications
- B:** Ceramic and metallic materials obtained by wet-chemical methods
- C:** Magnetic Materials
- D:** Organic Electronics and hybrids: materials and devices
- E:** Sol-Gel Materials: From Fundamentals to Advanced Applications
- F:** Anti-fouling Materials and Coatings
- G:** Research Frontiers of Computer Simulations in Materials Science: Developments and Applications
- H:** Luminescent Materials
- I:** Beyond Graphene: Low-dimensional systems based on graphene and III-Nitrides
- J:** IX Brazilian Electroceramics Symposium
- K:** Structure-Properties Relationship of Advanced Metallic Materials
- L:** Current Research in Energy Storage Systems
- M:** Nanomaterials for Nanomedicine
- N:** Surface Engineering - functional coatings and modified surfaces
- O:** Multifunctional materials derived from clay minerals
- P:** Advanced Carbon Nanostructures and Composites
- Q:** International Symposium on Cementitious Materials
- R:** Innovation and Technology Transfer Symposium
- S:** Advanced Materials
